RAVECOIN

How to Buy Ravecoin

Step 1 — Get a Solana Web3 Wallet

Get a wallet (we recommend Phantom):

- **Phantom** – browser extension & mobile (phantom.com)
- **Solflare** – browser extension & mobile (solflare.com)

Create your wallet and back up the recovery/seed phrase securely.
Never share your recovery/seed phrase.
Ravecoin will never DM you asking for wallet details or private keys.

Step 2 — Get on the Whitelist

Once your Web3 wallet has been created, you will need to share your wallet address with us in order to get on the whitelist. **Only whitelisted wallets will be able to buy $RAVE in step 4.**

- **Whitelist** your Solana wallet by visiting our profile on X **@ravecoin_xyz** and following the instructions, or emailing us at **contact@ravecoin.xyz**

Wallets whitelisted via X will qualify for a future bonus airdrop.

Step 3 — Fund Your Wallet

Option 1 : From a centralized exchange

- Buy SOL on Binance, Kraken, Coinbase, or your preferred centralized exchange.
- Send the SOL from your centralized exchange to your SOL Web 3 wallet (phantom, soflare, coinbase, etc.)

Option 2 : Directly Through Wallet

- Wallets like Phantom and Solflare offer built-in credit-card on-ramps (MoonPay, Ramp).
- Ideal for users without exchange accounts.
- Buy your SOL and you're ready for the step 4.

Step 4 — Connect wallet on ravecoin.xyz to make your purchase

Mobile App Users - Launch **Phantom** or **Solflare**

- **Phantom** users : click the search icon on bottom right and enter ravecoin.xyz
- **Solflare** users : click the explore icon and enter ravecoin.xyz

Desktop Users - Navigate to ravecoin.xyz using the browser that has the Phantom or Solflare extension & click the "select wallet" button.

IMPORTANT: Leave a minimum of $1USD of SOL in your wallet to cover transaction fees.

Confirmation

Once you have completed your purchase, your wallet will confirm a successful purchase & log your transaction. You will be able to view your transaction on the Solana blockchain by clicking:

- "View on Solscan" in Phantom
- "Transaction ID" in Solflare

These links are accessed by clicking on the transaction record in your wallet.

• Your transaction is recorded on-chain and tokens will automatically be sent to your wallet at the Token Distribution Event (TDE), after the main presale ends,as per the vesting schedule.

• The vesting schedule is 20% at TDE, and then 20% every 30 days (4 months total).
